Hike → Learn → Experience → Care → Protect

Youth • Science • Biodiversity • Water • Land • Traditional Knowledge

CONNECTING PEOPLE, NATURE & KNOWLEDGE IN MONGOLIA

Hiking with Knowledge (HWK) is a Mongolian NGO that combines outdoor experiences with field-based environmental learning.

Launched through the **One Million Leaders of Asia** programme in 2022 and operating as an NGO since 2024, HWK creates practical learning experiences that connect people with biodiversity, ecosystems, conservation and Mongolia's traditional knowledge.

WHY MONGOLIA

Mongolia provides a living field classroom where forests, steppe landscapes, rivers, wetlands, wildlife habitats, migratory bird routes and nomadic heritage can be explored directly.

It offers a practical setting for understanding the connections between **land, water, biodiversity and people**.

WHAT WE DO

Our field-learning programmes connect participants with:

Biodiversity & Wildlife

Birds • Mammals • Insects • Plants

Water & Ecosystems

Rivers • Wetlands • Aquatic Life • Beaver Ecosystems

Land & Conservation

Forests • Wildlife Habitats • Ranger Experiences

Youth & Learning

Environmental Education • Science • STEAM

Traditional Knowledge

Nomadic Heritage • Learning from People and Place

HWK works with researchers, conservation professionals, educators, rangers and local knowledge holders to bring practical knowledge into the field.

OUR APPROACH

Hike → Learn → Experience → Care → Protect

We believe people understand nature differently when they experience it directly. Field observation, professional knowledge and human connection can turn an outdoor experience into meaningful environmental learning.

PARTNERSHIP OPPORTUNITIES

We are looking for:

- Strategic international partners
- Programme sponsors and funding partners
- Research and expert collaborators
- Youth and education partners
- Institutional partners
- Joint projects and knowledge exchange

PARTNER WITH HWK

Partner with us to co-create field-based environmental learning in Mongolia that connects youth and communities with science, biodiversity, water, land and traditional knowledge.

Partners can contribute:

Funding • Expertise • Research • Educational Content • Networks • Institutional Support

Let's Hike. Learn. Experience. Care. Protect. — Together.
